

# Up to **\$1500 Cash** From the Government

Thanks to a recent government “economic stimulus” program, you can now earn up to \$1,500 in tax credits when you replace your heating or air conditioning equipment.

That’s not a tax deduction, that’s **real cash in your pocket!** If you have a tax liability of \$2,500 at the end of the year, you’ll only owe \$1,000 if you purchase qualifying equipment this year.

Unlike most government programs, this one is very easy to use. We’ll tell you exactly how to get your money. Just call us today for a free estimate and we’ll explain just how you can take advantage of this time-sensitive incentive.
